

# THE COMBINATION OF PRECISION AND EFFICIENCY

The CX 8105 seeding system combines the precision of the Contour independent drill with the seed metering accuracy and efficiency of the Morris air cart.

## Compact benefits

Available in sizes of 7,62 meter (25 ft) or 9,45 meter (31 ft), the compact design and 3 meter transport width makes moving from field to field safe and easy.

## Articulated design

The articulated design reduces weight transfer and increases land-following ability. The pivot allows the cart to move independently from the drill, side to side and front to back which improves stability and seeding accuracy in all field conditions.

## Independent opener technology

The independent opener features parallel linkage for ultra-precise seed and fertilizer placement. Each opener follows the contour of the ground, even on hills. Adjustable packer wheels provide on-row packing and excellent seed to soil contact.
